

PHARMACY BRIGADE

Borderless Brigade sends a fully staffed and equipped pharmacy team with the Medical Brigade to fill prescriptions ordered by the Medical Brigade. This team collects or purchases medications for treatment of most medical conditions encountered.

The medications issued by our Pharmacy Brigade consist of everything from over the counter medications such as analgesics, vitamins, antihistamines and topical creams to prescription medications for heart disease, blood pressure problems, diabetes, infections, parasites, gastro intestinal problems and respiratory issues. The typical Pharmacy Brigade issues medication from an inventory consisting of 70 different medications and various dosage sizes.

The cost of over the counter and prescription medications continues to increase to the point that even purchasing these medications in bulk is very expensive. The average cost of each prescription filled by Borderless has risen to about \$.90.

A typical international trip for our Pharmacy Brigade is made up of about nine pharmacy personnel. The average total budget for each international Pharmacy Brigade is \$25,150. This amount does not include international travel expense, we ask each of our participants to pay their own travel cost.

This budget consists of the following expenses:

- \$18,000 for medicines to distribute as prescribed by or Medical Brigade
- \$7,000 for in-country expenses (transportation, meals, lodging & security)
- \$150 for translators

Because the purchase of the medicines must be in bulk and because of customs restrictions for shipping internationally, you can best help by donating funds to help offset this budget

Please allow us to be your emissary as together we equip, embrace and enhance lives.
