

DENTAL BRIGADE

As you might imagine dental care in poverty stricken developing nations is inadequate at best. Without fluorinated water systems and available regular dental hygiene products many people suffer constant pain and discomfort from tooth decay. Borderless Brigade's Dental Brigade works with national dental professionals in temporary clinics set up in the villages and communities most affected in an effort to ease some of this pain and suffering.

Often because of malnutrition, children develop dental problems very early in life and without early intervention will have dental problems the rest of their lives. Our dedicated dental teams also collect toothbrushes and toothpaste to distribute in the villages they visit.

There are times when a patient of our dental clinic needs more care than we are able to supply in our temporary dental clinics. Borderless Brigade participates with private and national health facilities in those developing countries to arrange for oral surgeries or extended dental treatments to meet many of those needs at no cost to the patient.

A typical international trip for our Dental Brigade is made up of about five dental personnel. The average total budget for each international Dental Brigade is \$6,250. This amount does not include international travel expense, we ask each of our participants to pay their own travel cost. This budget consists of the following expenses:

- \$1,500 for dental supplies
- \$150 for translators
- \$3,900 for in-country expenses (transportation, meals, lodging & security)
- \$700 to pay dentist licensed to practice in the country of our visit

You can help by donating supplies from a list found on our website or by donating funds to help offset this budget.

Please allow us to be your emissary as together we equip, embrace and enhance lives.
